AKHILESH AYYAGARI

Cloud Infrastructure & Identity Architect | Infrastructure Project Manager
Atlanta, GA | (813) 330-1106 | ayyagari.akhilesh@gmail.com | linkedin.com/in/akhilesh-ayyagari

PROFESSIONAL SUMMARY

Cloud infrastructure and identity architect with 20+ years in Windows Server and Active Directory, now focused on Microsoft Entra ID and hybrid cloud (AWS, Azure). At T-Mobile, built a one-click DNS automation tool that cut manual DNS entry time by 90% and reduced privileged (PIM) access assignments by 50%. Led the on-schedule modernization of 500+ Windows Servers from 2012 to 2019 at PG&E with no rollbacks, and managed the upgrade lifecycle for 150+ server applications at Morgan Stanley while coordinating 50+ engineers.

CORE SKILLS

- **Identity and Access:** Microsoft Entra ID (Azure AD), Conditional Access, MFA, Privileged Identity Management (PIM), RBAC, just-in-time access, least privilege, OAuth 2.0, OpenID Connect (OIDC), SSO, Okta, AWS IAM, Active Directory (multi-forest, multi-domain), Group Policy, Quest
- **Cloud and Automation:** AWS, Microsoft Azure, hybrid cloud, AWS Route 53, enterprise DNS, load balancing, Terraform, PowerShell, Python, JavaScript, React, SQL, Git, Azure DevOps
- **AI Tools:** Microsoft Copilot, Claude, ChatGPT, Grok — AI-assisted automation, scripting, troubleshooting and documentation
- **Security and Compliance:** Microsoft Sentinel, KQL, Azure Log Analytics, Tenable, Nessus, CVSS-based vulnerability remediation, SSL/TLS certificate lifecycle, CIS Level 1/2, NIST, firewall policy review, audit support
- **Project Delivery:** PMO oversight, release and upgrade lifecycle management, stakeholder and vendor coordination, risk registers, executive reporting, change management, Jira, ServiceNow
- **Infrastructure:** Windows Server 2008 R2–2019, IIS, WSUS, SCCM/MECM, SCOM, Linux (Red Hat, Debian, CentOS), VMware ESXi/vCenter/vMotion, HPE SimpliVity, Hyper-V, Exchange, disaster recovery, BladeLogic, SolarWinds

CERTIFICATIONS

- Fortinet NSE 2 and NSE 1 Certified in Cybersecurity, Fortinet | NSE 2 badge · NSE 1 badge
- Claude Code 101 (course completion), Claude Academy by Anthropic | Nov 2026 | verify
- Lean Six Sigma Green Belt, Acuity Institute | May 2021 | credly.com/badges/3c9d0c48-d285-4bb2-86b7-4ca80a6c76f1

PROFESSIONAL EXPERIENCE

Infosys (client: T-Mobile), *Domain Architect* Mar 2026 - Oct 2026

- Built a one-click DNS automation tool that creates and updates DNS records for newly created endpoints, replacing manual DNS entry and cutting the time spent by 90%. Built with PowerShell and Python, a React/JavaScript front end and a SQL database, version-controlled in Git.
- Cut privileged access assignments in Microsoft Entra PIM by 50% by restricting PIM eligibility to personnel cleared to handle U.S. Government Customer Information (USGCI) and reducing approvers to a minimal set, shrinking the privileged attack surface; served as a designated PIM approver for a 100-member team.
- Designed and supported enterprise DNS and hybrid cloud infrastructure across AWS, Azure and on-premises, including AWS Route 53, load balancing and network security.
- Applied Entra ID Conditional Access and RBAC governance across an estate of 1,500+ Azure subscriptions and 500+ AWS accounts.
- Led root-cause analysis for authentication, DNS and cloud networking incidents, using Microsoft Sentinel and KQL in Azure Log Analytics across DNS, Entra ID sign-in and audit logs; troubleshot OAuth 2.0/OIDC issues for Entra ID–integrated applications.
- Automated infrastructure provisioning and operational workflows with Terraform and PowerShell, saving 2–3 hours of manual effort per week.
- Owned Windows Server operations for the DNS estate: WSUS upstream/downstream patching, CVSS-prioritized vulnerability remediation (DNS, Linux and application hosts) and SSL/TLS certificate renewals on IIS, DNS and WSUS servers.

Infosys (client: Morgan Stanley), *Project Manager* Dec 2024 - Mar 2026

- Managed the continuous upgrade lifecycle for 150+ server applications, both third-party and internally built, on monthly, quarterly and annual release cadences.
- Ran upgrade waves of 500+ machines at about a 95% first-pass success rate, then individually remediated the remaining 20–30 machines, bringing each wave to 100% completion.
- Provided PMO oversight for critical infrastructure projects: application upgrades, deployment testing, server hygiene and acquired-entity integrations.

- Coordinated 50+ engineers across infrastructure, application, security, networking, onshore, offshore and vendor teams; tracked delivery in Jira with risk registers, executive dashboards and remediation plans.

Infosys (client: Tractor Supply Company), *Technical Lead* Mar 2024 - Dec 2024

- Led technical operations and escalations for 2,700+ retail store servers running Linux, VMware and Oracle Xstore POS, including remote diagnostics through iDRAC; automated deployments and patching with BladeLogic.
- Mentored 15 offshore support engineers and improved Tier 1 documentation.

Infosys (client: Pacific Gas and Electric), *Infrastructure Lead* Sep 2023 - Mar 2024

- Led planning and technical delivery for the modernization of 500+ Windows Server 2012 systems to Windows Server 2019 in a utility enterprise environment, including readiness assessments, application compatibility testing, migration waves, validation and rollback planning; completed on schedule with no rollbacks.
- Migrated on-premises and host-to-host workloads onto VMware ESXi/vCenter; administered Active Directory, multi-domain replication, Group Policy and SCCM/MECM, and coordinated Windows patching, infrastructure changes and remediation.
- Worked across application, server, storage and network stakeholders to validate DNS/AD dependencies and system connectivity, resolve blockers, and protect production availability during migration activities.
- Prepared deployment and operational documentation, change-control evidence, test results and technical handoffs for post-migration support; built PowerShell automation for reporting.

Infosys (client: Empire State Building), *Infrastructure Architect* Aug 2021 - Sep 2023

- Architected enterprise server, network and security infrastructure using VMware vMotion, HPE SimpliVity, Aruba switching and WatchGuard firewalls.
- Designed backup and disaster recovery approaches and evaluated vendors and costs; delivered Windows Server migrations and Exchange upgrades, and troubleshot Okta SSO with on-premises AD.

State of Kansas, *Infrastructure Solutions Engineer* Nov 2020 - Aug 2021

- Managed multi-forest, multi-domain Active Directory with Quest tools and supported cross-agency AD consolidation; led Exchange upgrades, built SolarWinds monitoring and trained agency IT staff.

County of Los Angeles Department of Public Works, *Senior Windows Engineer*, *Security* Aug 2019 - Oct 2020

- Enforced CIS Level 1/2 compliance and remediated scan findings across Linux and Windows; migrated servers from 2008 R2 to 2016 and led the Windows 10 endpoint migration with SCCM; managed AD, SCCM and SCOM.

Austin Community College, *Senior Systems Engineer* Mar 2019 - Aug 2019

- Ran a security research lab with Tenable, Nessus and CyberArk privileged access controls; kept Red Hat, Debian and CentOS clusters CIS Level 1/2 compliant.

West Virginia Office of Technology, *Senior VoIP Engineer* Aug 2017 - Feb 2019

- Administered a Cisco Call Manager 11.5 cluster for 12,000+ users; handled incident and problem management and carrier escalations.

Bloomberg, *Windows Firewall Administrator (Contract)* May 2017 - Aug 2017

- Reviewed firewall rule sets across IBM, HP, pfSense, Fortinet and Cisco ASA; removed redundant, overly permissive and unused rules and contributed to audit reports.

Facorne Technologies, *Systems Engineer* Jan 2017 - May 2017

- Deployed HP ProLiant servers and HP storage, including racking, BIOS/UEFI, RAID, firmware and OS installation.

Takshshila Institute of Professional Studies, *Network Engineer and Business Developer* 2013 - 2015

- Managed a secured cloud server environment with centralized authentication across multiple locations.

Medphoenix, *Network Management Engineer* 2010 - 2013

- Designed a WSUS/SCCM patch compliance solution; administered Active Directory, Group Policy and Citrix for 800 users.

SK International (HP Silver Partner), *ProLiant Support Engineer and Systems Administrator* 2005 - 2010

- Supported HP ProLiant servers and storage; deployed Microsoft, VMware, Cisco and NetApp solutions; administered Active Directory and Hyper-V.

Manipal and Mahbub College, *Senior Systems Engineer* 2003 - 2005

- Administered Active Directory, campus servers and labs.

EDUCATION

- M.S., Information, Network and Computer Security (With Distinction), NYIT | 2015 - 2016, full-time
- B.Sc., Computer Science and Engineering, Magadh University (R.P.S. Institute of Technology) | 2003
- Graduate coursework, MBA (Project Management), Trine University | 2020 - 2021
