AKHILESH AYYAGARI

Cloud Infrastructure & Identity Architect | Infrastructure Project Manager
Atlanta, GA | (813) 330-1106 | ayyagari.akhilesh@gmail.com | linkedin.com/in/akhilesh-ayyagari

PROFESSIONAL SUMMARY

Cloud infrastructure and identity architect with 20+ years delivering secure hybrid cloud, Windows Server, Active Directory, and identity solutions across AWS, Microsoft Azure, and Microsoft Entra ID (Azure AD). At T-Mobile, supports identity and cloud access governance across 1,500+ Azure subscriptions and 500+ AWS accounts in an environment at 98% MFA and 95% Conditional Access coverage, and manages WSUS patching and certificate renewals for enterprise DNS, IIS, and Windows servers. Led a 500+ server Windows migration at PG&E and coordinated 50+ engineers at Morgan Stanley. Deep HP ProLiant hardware background. M.S., Information, Network and Computer Security (With Distinction).

CORE SKILLS

- **Identity and Access:** Microsoft Entra ID (Azure AD), OAuth 2.0, OpenID Connect (OIDC), SSO, Okta, Conditional Access, MFA, RBAC, Privileged Identity Management (PIM), just-in-time access, least privilege, Active Directory (multi-forest), Group Policy, AWS IAM, CyberArk (lab), Quest
- **Cloud and Automation:** AWS, Azure, hybrid cloud, Route 53, DNS, load balancing, Terraform, PowerShell, Azure DevOps
- **Security and Compliance:** Microsoft Sentinel, KQL, Azure Log Analytics, Tenable, Nessus, CVSS prioritization, vulnerability remediation, SSL/TLS certificate lifecycle management, CIS Level 1/2, NIST, firewall policy review, audit support
- **Infrastructure:** Windows Server 2008 R2-2019, IIS, WSUS (upstream/downstream), SCCM, SCOM, Linux (Red Hat, Debian, CentOS), VMware ESXi/vMotion, HPE SimpliVity, Hyper-V, Exchange, disaster recovery
- **Hardware and Storage:** HP ProLiant DL, BL (BladeSystem), and ML servers, HP storage, iLO, RAID, firmware, NetApp, Dell iDRAC
- **Delivery:** Project and vendor coordination, change management, risk logs, executive reporting, Jira, ServiceNow, BladeLogic, SolarWinds

CERTIFICATION

Lean Six Sigma Green Belt, Acuity Institute | May 2021 | credly.com/badges/3c9d0c48-d285-4bb2-86b7-4ca80a6c76f1

PROFESSIONAL EXPERIENCE

Infosys Aug 2021 - Present

Domain Architect | Project Manager | Technical Lead | Infrastructure Lead | Infrastructure Architect. Sequential client engagements under one employer.

T-Mobile (Infosys client engagement), *Domain Architect* Mar 2026 - Present

- Design and support enterprise DNS and hybrid cloud infrastructure across AWS, Azure, and on-premises environments, including AWS Route 53, load balancing, and network security.
- Manage WSUS upstream and downstream servers to patch DNS servers and other Windows Servers across the organization.
- Renew and update SSL/TLS certificates on IIS, DNS, and WSUS servers using the NCLM certificate management portal.
- Automate infrastructure provisioning and operational workflows with Terraform and PowerShell.
- Prioritize and remediate high-severity vulnerabilities (CVSS-based), including DNS server, Linux host, and application patching.
- Lead root-cause analysis for authentication, DNS, and cloud networking incidents, using Microsoft Sentinel and KQL in Azure Log Analytics to analyze DNS, Entra ID sign-in, and audit logs.
- Troubleshoot OAuth 2.0/OIDC authentication issues for applications integrated with Microsoft Entra ID.
- Support identity and cloud access governance across 1,500+ Azure subscriptions and 500+ AWS accounts using Microsoft Entra ID, Conditional Access, and RBAC, in an environment at 98% MFA and 95% Conditional Access coverage.
- Serve as one of the designated Infosys PIM approvers for a 100-member team, approving time-bound administrative access requests in Microsoft Entra Privileged Identity Management.

Morgan Stanley (Infosys client engagement), *Project Manager* Dec 2024 - May 2026

- Provided PMO oversight for critical infrastructure projects, including application upgrades, deployment testing, server hygiene, and acquired-entity integrations.
- Coordinated 50+ engineers across infrastructure, application, security, networking, onshore, offshore, and vendor teams.
- Tracked delivery in Jira with risk registers, executive dashboards, and remediation plans.

Tractor Supply Company (Infosys client engagement), *Technical Lead* Feb 2024 - Dec 2024

- Led technical operations and escalations for 2,700+ retail store servers running Linux, VMware, and Oracle Xstore POS, including remote diagnostics through iDRAC and vendor coordination.
- Automated OS and application deployments and patching with BladeLogic.
- Mentored support engineers and improved Tier 1 documentation.

Pacific Gas and Electric (PG&E) (Infosys client engagement), *Infrastructure Lead* Sep 2023 - Mar 2024

- Led migration of 500+ Windows Servers from Windows Server 2012 to 2019, including assessments, application compatibility testing, migration waves, and rollback planning.
- Administered Active Directory, Group Policy, and replication across multi-domain environments and resolved authentication issues.
- Built PowerShell automation for reporting and task management; supported hypervisor cluster configuration and file/print services.

Empire State Building (Infosys client engagement), *Infrastructure Architect* Aug 2021 - Sep 2023

- Architected enterprise server, network, and security infrastructure using VMware vMotion, HPE SimpliVity, Aruba switching, and WatchGuard firewalls.
- Delivered Windows Server migrations and Exchange Server upgrades.
- Troubleshot Okta authentication and SSO issues alongside on-premises Active Directory.
- Designed backup and disaster recovery approaches and evaluated vendors and costs for refresh decisions.

State of Kansas, *Infrastructure Solutions Engineer* Nov 2020 - Aug 2021

- Managed multi-forest, multi-domain Active Directory with Quest tools; supported cross-agency AD consolidation and resolved authentication and replication issues.
- Led Exchange Server upgrades; built SolarWinds dashboards and alerts for faster issue detection; trained agency IT staff.

County of Los Angeles Department of Public Works, *Senior Windows Engineer*, *Security* Aug 2019 - Oct 2020

- Managed Active Directory, SCCM, and SCOM; enforced CIS Level 1 and 2 compliance across Linux and Windows and remediated vulnerabilities found in security scans.
- Migrated servers from Windows Server 2008 R2 to 2016 and led the Windows 7/8/8.1 to Windows 10 endpoint migration using SCCM packages and task sequences.

Austin Community College, *Senior Systems Engineer* Mar 2019 - Aug 2019

- Ran a security research lab using Tenable, Nessus, and CyberArk; implemented CyberArk privileged access controls for administrative credentials in the lab.
- Kept Red Hat, Debian, and CentOS clusters compliant with CIS Level 1 and 2 using documented, repeatable builds.

West Virginia Office of Technology, *Senior VoIP Engineer* Aug 2017 - Feb 2019

- Administered a Cisco Call Manager 11.5 cluster (Unity, Unity Connection, Emergency Responder) for 12,000+ users.
- Handled incident and problem management, SIP trunking and call-quality troubleshooting, and carrier escalations.

Bloomberg, *Windows Firewall Administrator* May 2017 - Aug 2017

- Reviewed firewall rule sets across IBM, HP, pfSense, Fortinet, and Cisco ASA; identified rules allowing unsecured ports or non-existent addresses and helped clean up redundant, overly permissive, and unused rules after validating business justification.
- Standardized firewall documentation and policies and contributed to audit reports.

Facorne Technologies, *Systems Engineer* Jan 2017 - May 2017

- Deployed HP ProLiant DL, BL (BladeSystem), and ML servers and HP storage, including racking, cabling, BIOS/UEFI, RAID, firmware, and OS installation.

EARLIER EXPERIENCE

- **Takshshila Institute of Professional Studies**, Network Engineer and Business Developer (2013 - 2015): Managed a secured cloud server environment with centralized authentication across multiple locations.
- **Medphoenix**, Network Management Engineer (2010 - 2013): Designed a WSUS/SCCM patch compliance solution; administered Active Directory, Group Policy, and Citrix for 800 users.
- **SK International (HP Silver Partner)**, ProLiant Support Engineer and Systems Administrator (2005 - 2010): Installed, configured, and supported HP ProLiant DL, BL, and ML servers and HP storage, including iLO, RAID, firmware, and hardware troubleshooting; deployed Microsoft, VMware, Cisco, and NetApp solutions; administered Active Directory and Hyper-V.
- **Manipal and Mahbub College**, Senior Systems Engineer (2003 - 2005): Administered Active Directory accounts and supported campus servers, networks, and labs.

EDUCATION

- M.S., Information, Network and Computer Security (With Distinction), New York Institute of Technology | 2016
- B.Sc., Computer Science and Engineering, Magadh University (R.P.S. Institute of Technology) | 2003
- Graduate coursework, Master of Business Administration (Project Management), Trine University | 2020 - 2021
